

Special HEPA Safe-Change Units

Custom designed air filtration units for applications in the Pharmaceutical & Chemical production sector

Working closely with customers, EMCEL has designed many unique air filtration units to meet the critical and stringent requirements of the Pharmaceutical and Chemical industries.

EMCEL will supply a complete package from concept design drawings to production and delivery. Housings, in a variety of configurations, are normally produced in stainless steel, although a selection of materials are available. All units are supplied complete with HEPA filter elements (manufactured & tested in-house) and all the necessary safe-change bags and rings needed for first replacement. Any following spares can be supplied on a agreed call-off basis if required.

Design requirements may include:

- Shock Testing
- High Pressure
- Negative Pressure
- High Temperature
- Corrosive Air-Flows
- Flushable Housings
- Mounting Frames
- Full Documentation
- Material Certification
- Weld Procedures
- Dye Penetration Test
- DOP Testing
- Determine Safe-change procedures
