

# MINIPLEAT Filters

Available in panel or cylindrical format, Minipleat filters are designed for fine filtration from F5-F9 efficiency.

The *new* EMCEL Minipleat particle filter range is designed for applications where fine filtration is required, but not to the extent of HEPA filtration.

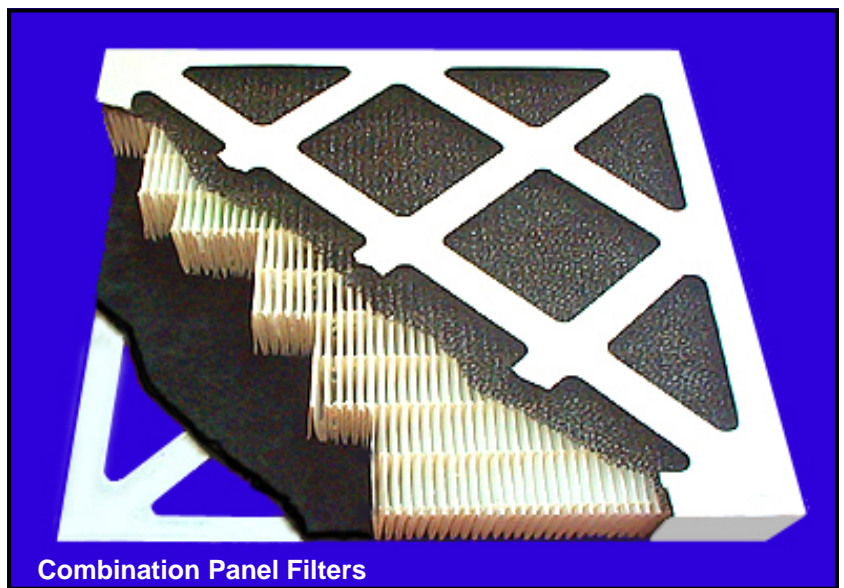

Minipleats available in a range of filter frame/housing constructions, including aluminium, mild steel, stainless steel and fibreboard for cost effective panel versions.

Also available within this range are 2-3 stage combination type panels. A polyurethane foam prefilter can be incorporated within the panel, with a carbon impregnated pad to provide a good level of odour removal and particulate filtration.

Please see picture for details.

- Applications include:**
- **Pharmaceutical Plants**
  - **Air Conditioning Units**
  - **Pre-Filtration to Critical Applications**
  - **Beauty/Cosmetic Booths**
  - **Tobacco Smoke Units**

The Minipleat Filters can be designed and manufactured in any quantity to suit customer specification. The EMCEL Technical Sales Team will be pleased to advise on individual applications for Minipleat Filters or any other air filtration requirements.
