

## EBM076: CARBON ZERO / LOW STATEMENT

As the World reflects on measures to combat Climate Change, all organisations small and large will need to implement changes to our working practices in order to meet local, national and global targets. This statement is provided to our customers, suppliers and other stakeholders as a sign of our commitment towards a lower carbon footprint and ultimately aspirations towards Net Zero targets.

### What have we done already?

#### Investment

---

- A new fully insulated Factory Roof across both Emcel units leading to significant savings in Energy and Emissions across the site for the whole year.
- Movement towards Hybrid Company Vehicles to cut fuel usage.
- Interactive Meeting Hub for Customer / Supplier meetings to avoid travel where possible.
- Replacement of Windows for complete Emcel estate for increased Energy Savings.
- A drive to reduce manufacturing waste throughout the site.
- Increase in Recyclable materials both in production and general use throughout the company.
- Energy saving spacing technology for HEPA and Pleated Filter Elements.

#### Our Commitment

---

- Upgrade of plant to Environmentally friendly solutions.
- Emcel to strive towards improving our manufacturing processes to avoid waste.
- Selecting suppliers with the same Environmental values as Emcel.
- Encourage employees to assess their own Environmental impact when travelling to / from work.
- Considering the Environment in Strategic Business Solutions.
- Utilise sustainable sources for raw materials.

#### Aspirations

---

To play our role in achieving Carbon Zero targets, including working towards paperless offices.
